## Local Tabernacle Team

Last term, with the help of American construction teams we were able to train a local Ivory Coast team for the fabrication and erection of tabernacle church kits. We have trained two welders for the fabrication who also work with five other workers in construction. In the past 8 months that we have been back in the USA the local team has built 17 tabernacles. Most of these kits were financed by local church offerings. The large churches are buying kits for new church plants among the unreached. We praise the Lord for the ongoing ministry and hope that one day we will have multiple teams able to do the work.
